Elliott Livestock – Wild Rose Cattle Company

Simmental Bulls & Bred Heifers

Welcome

We would like to invite you to our 2022 annual production sale. Time continues to go by way too fast. Visitors are always welcome and we would love to be able to visit with you and show you our genetics any time you can travel over. We enjoy visiting with many of you throughout the years and adjusting our breeding program to better meet your needs.

We have been very blessed again this year. This spring's calving season was very muddy and wet, but we were fortunate to access more bedding to help keep the cows and calves a little drier. We weren't able to get into the fields until later than usual, but had pretty good weather throughout the summer and the crops progressed very nicely.

This year's selection of bulls have been grown on a balanced, high fiber ration and have not been exposed to any cows. The bred heifers were pastured with the rest of the herd and brought home to get clipped and prettied up. We have genotyped our whole herds with Cow Herd DNA Roundup and will continue to do Calf Crop Genomics to get the most accurate EPDs when analyzing our herd. Most of our calving group is kept through our carcass ultrasounds done in the spring. These actions make for a more sound selection year after year to better our herd and yours.

We have been continuously working to improve our herds. We strive to use top end genetics and focus on functional, productive, high quality carcass cattle to give our customers as much potential as possible.

We appreciate your interest in our bulls and select bred heifer offering this year and would like to thank all our family, friends and customers for all your support over the years. We look forward to meeting and serving new friends and customers in the future. Stop on out to the farm before sale day to take a look at our offering and we hope to see you on sale day!

Consulting Nutritionist

Dr Erik Loe, Midwest Nutrition & Consulting 605-690-6594

Sale Location:

Elliott Livestock is located 2 miles North of Clifford, ND.
The farm will be on the west side of the road and there will be signs the day of the sale.

Announcements

All announcements and changes made from the auction block will take precedence over printed material associated with this sale. Anyone attending the sale attends at their own risk. Elliott Livestock or any of the sale force will not be responsible for any personal injury or loss for attending the sale.

EPD Information

Note that EPDs may change from the time the catalog is printed to the time the animal is sold.

Sale Format

This sale will be broadcasted on DVAuction. Therefore the animals will not be going through a sale ring, but will be penned on sale day to evaluate.

Sight Unseen Purchases

We guarantee all sight unseen purchases. Call ahead of time and we will go over the offering. You can leave a bid with us or a representative. You will be treated as if you are here.

Retained Semen Interest

The bull buyer will receive full possession, 100% salvage value, and 80% semen interest of any bull purchased in this sale. Elliott Livestock reserves the right to collect semen on the bull, for in herd use, at our expense and the buyer's convenience.

Delivery

Bulls will be delivered free of charge up to 500 miles from the ranch. We will work with the buyer to arrange the most economical delivery for distances over 500 miles. Any cattle selling to Canada will be delivered to the nearest border crossing facility on the ND side. Buyers will be responsible for any costs associated with testing/clearance for export.

Insurance

We recommend that you purchase insurance on your bulls. Insurance will be available sale day.

Terms & Conditions

1. Terms of the sale are cash or check at the time of sale unless other arrangements are made prior to the sale.
2. Starting December 1st, the buyer will pay \$3.00/ head/day for feed and yardage.
3. All bulls are guaranteed breeders. Purchasers shall let the seller know within 10 months of purchase date if the bull is unsatisfactory. Bulls will be returned to the ranch at buyer's expense. Seller has the right to semen check the bull if found unsatisfactory. Seller will replace the bull with a bull of equal value agreed on by both parties or return purchase price. In no instance shall the seller be responsible for more than the purchase price.
4. Each animal becomes the property of and therefore is also the risk of the purchaser as soon as it is sold: except it shall be the obligation of the seller to see that animals are fed and cared for free of charge to purchaser, until loaded for shipment or until the expiration of seven days after the sale, whichever occurs first. We guarantee the cattle to be healthy on sale day.
5. We will abide by the rules set forth by the American Simmental Association.
6. As we have no control over the acts of God, we cannot guarantee these cattle against a death loss, injury, or sickness. We guarantee cattle to be healthy on sale day.

Quick Reference to ASA EPDs and \$ Indexes

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-*pounds* more *weaning weight* than B. If calving ease were the trait, A would be expected to sire 15-*percent* more *unassisted births* in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org. Listed below are the units ASA EPDs are expressed in:

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

Average Daily Gain (ADG): Pounds of post-weaning daily weight gain.

Back Fat (BF): Inches of backfat.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Carcass Weight (CW): Pounds of carcass weight.

Docility (DOC): Percent of offspring achieving a docile (1) score.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (MLK): Pounds of weaning weight due to milk.

Marbling (MRB): Marbling score.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of ribeye.

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a steak.

Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Yield Grade (YG): Yield grade score.

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years ($\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the population. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org.

Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids — our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.
